1. Register

Test Case ID:	TC-REG-001		
Test Case Name:	Register Account		
Test Case Description:	Verify user registration with email and password and email verification flow		
Pre-Conditions:	User does not have an existing registered account		
Post-Conditions:	User receives confirmation email User account is set to unverified User account becomes active upon email verification		
Created By:	J'sen Ong	Last Updated By:	J'sen Ong
Date Created:	31/03/2025	Last Updated:	31/03/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	User clicks on "Create a new account"	Redirects the user to the registration page, where they can enter their Username, Email	Redirects the user to the registration page, where they

		Address, and Password.	can enter their Username, Email Address, and Password.
2.	User clicks on "Create Account"	Upon successful registration, a verification email is sent to the user. • If the username or email is already taken, the user is prompted to enter a different one. • If the password fails to the meet the criteria, the user receives a prompt specifying the required criteria.	Upon successful registration, a verification email is sent to the user. • If the username or email is already taken, the user is prompted to enter a different one. • If the password fails to the meet the criteria, the user receives a prompt specifying the required criteria.

2. Login

Test Case ID:	TC-LOGIN-002		
Test Case Name:	Registered User Login		
Test Case Description:	Verify login functionality with correct and incorrect credentials		
Pre-Conditions:	Users must be registered and email verified		
Post-Conditions:	User is logged into Wanderers		
Created By:	J'sen Ong	Last Updated By:	J'sen Ong
Date Created:	31/03/2025	Last Updated:	31/03/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	User clicks on "Login".	The user is redirected to the Login Page, where they can enter their email address and password.	The user is redirected to the Login Page, where they can enter their email address and password.

2.	Users fill in the credentials of their registered account.	The email input field displays the information typed by the user. The password input field hides the characters for privacy.	The email input field displays the information typed by the user. The password input field hides the characters for privacy.
3.	User clicks on “Sign in”.	Wanderers will validate the user’s input against the database. • Upon successful validation, the user gains access to their registered account and is redirected to the protected route – the Home page. • If the validation fails, Wanderers will display the message “Invalid Credentials” to inform the user that their credentials are not valid.	Wanderers will validate the user’s input against the database. • Upon successful validation, the user gains access to their registered account and is redirected to the protected route – the Home page. • If the validation fails, Wanderers will display the message “Invalid Credentials” to inform the user that their credentials are not valid.

3. Logout

Test Case ID:	TC-LOGOUT-003		
Test Case Name:	Registered User Logout		
Test Case Description:	Verify that user is logged out successfully and session is terminated		
Pre-Conditions:	User is logged in		
Post-Conditions:	User session is ended and access to protected routes is revoked		
Created By:	J'sen Ong	Last Updated By:	J'sen Ong
Date Created:	31/03/2025	Last Updated:	31/03/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	Users click on their profile icon.	Wanderers will display a dropdown menu with the options to manage "Settings" or "Logout".	Wanderers will display a dropdown menu with the options to manage

			“Settings” or “Logout”.
2.	User clicks on “Logout”	Users are signed out and redirected to Wanderers Call-To-Action page.	Users are signed out and redirected to Wanderers Call-To-Action page.

4. Create Itinerary

Test Case ID:	TC-ITIN-CREATE-004		
Test Case Name:	Create Itinerary		
Test Case Description:	Verify user can create a new itinerary with valid trip details		
Pre-Conditions:	User is logged in		
Post-Conditions:	New itinerary is created and saved into the database		
Created By:	J'sen Ong	Last Updated By:	J'sen Ong
Date Created:	31/03/2025	Last Updated:	31/03/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	The user enters valid trip details, optionally invites tripmates, and clicks "Start Planning" to begin	The itinerary is created successfully, and the user is redirected to the newly created itinerary page.	The itinerary is created successfully, and the user is redirected to the newly created itinerary page.

	organizing the trip.		
2.	The user tries to add a collaborator	Wanderers will display the following alert messages based on the user's input: • If the user inputs a valid email address, the tripmates input field will automatically display the email address they have typed. • If the user inputs their own email address, Wanderers will alert: "You cannot add yourself as a collaborator." • If the user inputs an invalid email address, Wanderers will alert: "Please enter a valid email address." • If the user inputs an email address that is not registered with Wanderers, it will alert: "This email	Wanderers will display the following alert messages based on the user's input: • If the user inputs a valid email address, the tripmates input field will automatically display the email address they have typed. • If the user inputs their own email address, Wanderers will alert: "You cannot add yourself as a collaborator." • If the user inputs an invalid email address, Wanderers will alert: "Please enter a valid email address." • If the user inputs an email address that is not registered with Wanderers, it will

		address is not registered with Wanderers."	alert: "This email address is not registered with Wanderers."
--	--	--	--

5. View Itinerary

Test Case ID:	TC-ITIN-VIEW-005		
Test Case Name:	View Itinerary		
Test Case Description:	Verify user can view itinerary details after creation or invitation		
Pre-Conditions:	User is logged in and has access to the itinerary		
Post-Conditions:	Itinerary details are displayed on screen		
Created By:	J'sen Ong	Last Updated By:	J'sen Ong
Date Created:	31/03/2025	Last Updated:	31/03/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	The user clicks on an itinerary of their choice to view its details.	Wanderers will redirect the user to the itinerary page, where the itinerary details are loaded	Wanderers will redirect the user to the itinerary page, where the itinerary details are loaded

		correctly from the database.	correctly from the database.
--	--	---------------------------------	---------------------------------

6. Edit Itinerary

Test Case ID:	TC-ITIN-EDIT-006		
Test Case Name:	Edit Itinerary		
Test Case Description:	Verify user can edit itinerary with valid trip details		
Pre-Conditions:	The user must be the owner of the itinerary. User has been granted editing permissions by the owner. The itinerary must exist and be accessible.		
Post-Conditions:	The system updates the itinerary with the user's changes. The updated itinerary is available for viewing by the owner and other collaborators.		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	The user enters the itinerary and modifies trip details (title, description, dates).	The Itinerary is updated successfully, and the user can see updated changed trip details.	The Itinerary is updated successfully, and the user can see updated changed trip details.

2.	The user enters the itinerary and adds or removes activities.	The Itinerary is updated successfully, and the user can see the added activity or don't see the deleted activity.	The Itinerary is updated successfully, and the user can see the added activity or don't see the deleted activity.
3.	The user enters the itinerary and can add, modify or remove expenses.	The Itinerary is updated successfully, and the user can see the added/updated expenses or not see the removed expenses.	The Itinerary is updated successfully, and the user can see the added/updated expenses or not see the removed expenses.

7. Delete Itinerary

Test Case ID:	TC-ITIN-DELETE-007		
Test Case Name:	Delete Itinerary		
Test Case Description:	Verify user can delete an itinerary		
Pre-Conditions:	The user is already logged in The user must own the itinerary		
Post-Conditions:	The itinerary and its children are marked as archived The user will be redirected to the home page The user is shown a success notification		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	The user deletes an itinerary	The itinerary is deleted successfully, and the user will not see the deleted itinerary.	The itinerary is deleted successfully, and the user will not see the deleted itinerary.

2.	The user tries to undo deletion of an itinerary	Wanderers will display the following alert messages based on the user's input: • “You have deleted an activity, click here to Undo”, with a button undo shown. • If the user pressed the button, Wanderers would alert: "Itinerary has been restored." • If the user did not press the button, as it was meant to be deleted, Wanderers will not show any alert, the itinerary is removed.	Wanderers will display the following alert messages based on the user's input: • “You have deleted an activity, click here to Undo”, with a button undo shown. • If the user pressed the button, Wanderers would alert: "Itinerary has been restored." • If the user did not press the button, as it was meant to be deleted, Wanderers will not show any alert, the itinerary is removed.
----	---	---	---

8. Create Activity

Test Case ID:	TC-ACT-CREATE-008		
Test Case Name:	Create Activity		
Test Case Description:	Verify user can create a new activity with valid trip details		
Pre-Conditions:	The user must be logged in The user must own the itinerary The itinerary exists and is not archived		
Post-Conditions:	New activity entry(s) will be created under the itinerary. The activity is displayed in the itinerary's activity list without refreshing the page The user can continue adding more activities or close the form.		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	The user enters that itinerary and adds an activity via the "Add Places" button, he/she enters the place and dates.	The activity dialog modal will show, and after entering the activity details, the activity is created successfully.	The activity dialog modal will show, and after entering the activity details, the activity is

			created successfully.
--	--	--	--------------------------

9. View Activity

Test Case ID:	TC-ACT-VIEW-09		
Test Case Name:	View Itinerary		
Test Case Description:	Verify user can view the activity with valid details		
Pre-Conditions:	User is logged in		
Post-Conditions:	New itinerary is created and saved into the database		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	When the user has completed entering the activity details and press "submit"	The user is redirected back to the itinerary page with the activity added displayed	The user is redirected back to the itinerary page with the activity added displayed

10. Edit Activity

Test Case ID:	TC-ACT-EDIT-010		
Test Case Name:	Edit Activity		
Test Case Description:	Verify user can edit activity in itinerary page		
Pre-Conditions:	User is logged in		
Post-Conditions:	New itinerary is created and saved into the database		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	When the user has completed entering the activity details and press "submit"	The user is redirected back to the itinerary page with the activity added displayed	The user is redirected back to the itinerary page with the activity added displayed

11. Delete Activity

Test Case ID:	TC-ACT-EDIT-011		
Test Case Name:	Delete Activity		
Test Case Description:	Verify user can delete activity in itinerary page		
Pre-Conditions:	User has access to an itinerary; User has activity(s)		
Post-Conditions:	Activity is deleted from database		
Created By:	Miko	Last Updated By:	Miko
Date Created:	1/04/2025	Last Updated:	1/04/2025
Test Case No.	Description	Expected Outcome	Actual Output
1.	When the user has completed entering the activity details and press "submit"	The user is redirected back to the itinerary page with the activity added displayed	The user is redirected back to the itinerary page with the activity added displayed

13. Backend: Integration Testing Report

- Code coverage for backend files is at **83.7%**. Although code coverage does not determine quality of the test, proper mocking of test conditions to simulate real world test cases were added to ensure tests are robust. This is run per CI check and are considered “fast” tests.

14. Frontend: End-To-End (E2E) Testing Report

S/N	Name	Description	Location	Input	Expected	Outcome	Pass/ Fail	Tester	Signoff
	User								
1	Register								
1.1	Username								
	Register with existing username	Verify that the system prevents duplicate users	https://wandererS-prd.vercel.app/register	johnDoe	Application displays "Username is taken!"	Application displays "Username is taken!"	Pass	J'sen Ong	Isaac Chun
1.2	Email Address								
	Register with existing email address	Verify that the system prevents duplicate users	https://wandererS-prd.vercel.app/register	John@example.com	Application displays "Email already in use!"	Application displays "Email already in use!"	Pass	J'sen Ong	Isaac Chun
1.3	Password								
1.3.1	Register with password < 8 characters	Verify that the system rejects passwords < 8 characters	https://wandererS-prd.vercel.app/register	Pass123!	Application displays "Password must be at least 8 characters long!"	Application displays "Password must be at least 8 characters long!"	Pass	J'sen Ong	Isaac Chun
1.3.2	password with no uppercase letter	Verify that the system rejects passwords without uppercase letters	https://wandererS-prd.vercel.app/register	password1!	Application displays "Password must contain at least one uppercase letter"	Application displays "Password must contain at least one uppercase letter"	Pass	J'sen Ong	Isaac Chun
1.3.3	password with no lowercase letter	Verify that the system rejects passwords without lowercase letters	https://wandererS-prd.vercel.app/register	PASSWORD1!	Application displays "Password must contain at least one lowercase letter"	Application displays "Password must contain at least one lowercase letter"	Pass	J'sen Ong	Isaac Chun
1.3.4	password with no special character	Verify that the system rejects passwords without special characters	https://wandererS-prd.vercel.app/register	Password123	Application displays "Password must contain at least one special character (!@#%\$^&*)"	Application displays "Password must contain at least one special character (!@#%\$^&*)"	Pass	J'sen Ong	Isaac Chun

1.3.5	Register with appropriate password strength	Verify that the system accepts passwords with an appropriate level of strength	https://wanderers-prd.vercel.app/register	Password123!	Application displays "Registration Successful. Please check your email to verify your account."	Application displays "Registration Successful. Please check your email to verify your account."	Pass	J'sen Ong	Isaac Chun
2	Login								
2.1	Login with invalid Email Address	Verify that the system correctly validates the user's input email address	https://wanderers-prd.vercel.app/login	Johncena@example.com	Application displays "Invalid Credentials"	Application displays "Invalid Credentials"	Pass	J'sen Ong	Isaac Chun
2.2	Login with invalid Password	Verify that the system correctly validates the user's input password	https://wanderers-prd.vercel.app/login	JohnCen@1!	Application displays "Invalid Credentials"	Application displays "Invalid Credentials"	Pass	J'sen Ong	Isaac Chun
2.3	Login with valid credentials	Verify that the system correctly validates both the input email address and password	https://wanderers-prd.vercel.app/login	Username: John@example.com Password: P@ssw0rd!	Upon successful validation, the user gains access to their registered account and is redirected to the protected route – the Home page	Upon successful validation, the user gains access to their registered account and is redirected to the protected route – the Home page	Pass	J'sen Ong	Isaac Chun
3	Logout								
3.1	User clicks on "Logout"	Verify that user is logged out successfully and session is terminated	https://wanderers-prd.vercel.app/home	User clicks on their profile icon and "Logout"	User is signed out and redirected to Wanderers Call-To-Action page	User is signed out and redirected to Wanderers Call-To-Action page	Pass	J'sen Ong	Isaac Chun
Itinerary									
4	Create Itinerary								
4.1	Title								
4.1.1	User omits the itinerary plan title	Verify that the system checks whether the itinerary plan title is appropriate	https://wanderers-prd.vercel.app/create-itinerary	[EMPTY INPUT]	Application display "Title is required."	Application display "Title is required."	Pass	J'sen Ong	Isaac Chun
4.2	Destination								
4.2.1	User did not select a destination	Verify that the system checks if	https://wanderers-prd.vercel.app/create-itinerary	[EMPTY INPUT]	Application display "Please select a country."	Application display "Please select a country."	Pass	J'sen Ong	Isaac Chun

		the user selects a destination	prd.vercel.app/cr-eate-itinerary						
4.3	Collaborator								
4.3.1	User input own Email Address in Collaborator field	Verify that the system does not allow the user to enter their own email address in the Collaborator field	https://wanderer.s-prd.vercel.app/cr-eate-itinerary	John@example.com	Application displays "You cannot add yourself as a collaborator."	Application displays "You cannot add yourself as a collaborator."	Pass	J'sen Ong	Isaac Chun
4.3.2	User input invalid Email Address in Collaborator field	Verify that the system checks the format of the email address entered in the Collaborator field	https://wanderer.s-prd.vercel.app/cr-eate-itinerary	Johncena.com	Application displays "Please enter a valid email address."	Application displays "Please enter a valid email address."	Pass	J'sen Ong	Isaac Chun
4.3.3	User input an Email Address that is not registered with Wanderers in Collaborator field	Verify that the system checks the email entered in the Collaborator field against the existing registered accounts	https://wanderer.s-prd.vercel.app/cr-eate-itinerary	Johncena@example.com	Application displays "This email address is not registered with Wanderers."	Application displays "This email address is not registered with Wanderers."	Pass	J'sen Ong	Isaac Chun
4.3.4	User omits input in Collaborator field	Verify that the system accepts the absence of collaborators in the Collaborator field.	https://wanderer.s-prd.vercel.app/cr-eate-itinerary	[EMPTY INPUT]	Application displays "Your itinerary has been successfully created!" and redirects the user to the Itinerary Page	Application displays "Your itinerary has been successfully created!" and redirects the user to the Itinerary Page	Pass	J'sen Ong	Isaac Chun
4.3.5	User input a valid collaborator 's email address in Collaborator field	Verify that the system checks the email entered in the Collaborator field against the existing registered accounts	https://wanderer.s-prd.vercel.app/cr-eate-itinerary	johnny_depp@gmail.com	Application displays "Your itinerary has been successfully created!" and redirects the user to the Itinerary Page	Application displays "Your itinerary has been successfully created!" and redirects the user to the Itinerary Page	Pass	J'sen Ong	Isaac Chun
5	View Itinerary								
5.1	The User wants to view selected	Verify user can view itinerary details after	https://wanderer.s-	The user clicks on an itinerary of their	Application will redirect the user to the itinerary page,	Application will redirect the user to the itinerary page,	Pass	J'sen Ong	Isaac Chun

	itinerary details	creation or invitation	prdv.vercel.app/home	choice to view its details	where the itinerary details are loaded correctly from the database.	where the itinerary details are loaded correctly from the database.			
6	Edit Itinerary								
6.1	Title								
6.1.1	User wants to change the itinerary title	Verify if the user can see the updated title	https://wandererS-prdv.vercel.app/itinerary/1/	The user clicks on the title input and change the title	The application will save this title and update the title on the database	The application even after refresh will always display the updated title	Pass	Miko Leong	Isaac Chun
6.2	Dates								
6.2.1	User wants to change the itinerary dates	Verify if the user can see the updated dates	https://wandererS-prdv.vercel.app/itinerary/1/	The user clicks on the calendar picker for BOTH start date and end date	The application will save both dates and update them on the database	The application even after refresh will always display the updated dates even if the user only changed 1 date.	Pass	Miko Leong	Isaac Chun
6.2.2				The user clicks on the calendar picker for ONLY start date [EMPTY INPUT] for the end date	The application will save the changed start dates and update both updated start date and original end date on the database		Pass	Miko Leong	Isaac Chun
6.2.3				The user clicks on the calendar picker for ONLY end date [EMPTY INPUT] for the start date	The application will save the changed end dates and update both updated end date and original start date on the database		Pass	Miko Leong	Isaac Chun
7	Delete Itinerary								
7.1	User deletes the itinerary and never intend to restore it	Verify if the user can see at least an alert of a proof of the itinerary being deleted	https://wandererS-prdv.vercel.app/home	The user clicks on the delete button	The application will prompt an alert dialog to inform the user the itinerary has been deleted and redirects user to the home page	The application will not have the deleted itinerary displayed	Pass	Miko Leong	Isaac Chun
7.2	User deletes the itinerary but intends to restore it	Verify if the user can see a proof of the deleted itinerary being restored	https://wandererS-prdv.vercel.app/home	The user clicks on the undo button in the alert pop-up	The application will prompt an alert dialog to inform the user the supposedly deleted itinerary has been restored and redirects user to the home page	The application displays the itinerary that was previously deleted	Pass	Miko Leong	Isaac Chun
	Activity								

8	Create Activity								
8.1	Dates								
8.1.1	User wants to add the activity dates	Verify if the user can see the updated dates	https://wanderer.s-prd.vercel.app/itinerary/1/	The user clicks on the calendar picker for BOTH start date and end date	The application will save both dates and update them on the database	The application even after refresh will always display the updated dates even if the user only changed 1 date.	Pass	Miko Leong	Raghav
8.1.2				The user clicks on the calendar picker for ONLY start date [EMPTY INPUT] for the end date	The application will save the changed start dates and update both updated start date and original end date on the database		Pass	Miko Leong	Raghav
